DPDP Compliance Scan Report

No personal identifiable information (PII) is collected or stored by this application. The primary risk surface relates to the functionality of the audio player itself, not data privacy.

Validation Summary Rule findings: 4 confirmed, 0 false positives suppressed • AI gaps: 0 dual-validated • Score: 99 (rules) → 99 (integrated)

Total findings: 4
INFO: 3

Tech Stack: JavaScript

Risk Profile: No personal identifiable information (PII) is collected or stored by this application. The primary risk surface relates to the functionality of the audio player itself, not data privacy.

Compliance score by section

DPDP Section	Weight	Score	Status
Section 6	22	22/22 (100%)	PASS
Section 6(6)	8	8/8 (100%)	PASS
Section 8(1)	18	18/18 (100%)	PASS
Section 8	10	10/10 (100%)	PASS
Section 8(3)	8	8/8 (100%)	PASS
Section 8(4)	8	8/8 (100%)	PASS
Section 8(6)	8	6.8/8 (85%)	PASS
Section 9	6	6/6 (100%)	PASS
Section 11	6	6/6 (100%)	PASS
Section 16	4	4/4 (100%)	PASS
Section 5	2	2/2 (100%)	PASS
Section 13 — Grievance Redressal		4/4 (100%)	PASS

Estimated Total Remediation Effort: 0.2–0.8 engineering days

Rule	Section	Severity	File
NO_BREACH_ALERTING	Section 8(6) — Breach	LOW	N/A
NO_THIRD_PARTY_DETECTED	Section 5 — Notice	INFO	N/A
NO_THIRD_PARTY_DATA_SHARING	Section 5 — Purpose Limitation	INFO	N/A
NO_CROSS_BORDER_DETECTED	Section 16 — Cross-Border Transfer	INFO	N/A

30-Day Remediation Roadmap

The following plan prioritises findings by severity and estimated effort. Complete Week 1 items before your next security review.

Week 4 — Advisory (2–6 hours)

Address before next compliance review.

- No Breach Alerting (2–6 hrs)

Total estimated remediation effort: 2–6 hours (0.2–0.8 engineering days)

Details

Finding 1 of 4

[Section 8(6) — Breach]

1. [LOW] NO_BREACH_ALERTING — N / A**Estimated fix time:** 2–6 hours

Structured logging detected but no breach notification mechanism found. DPDP Section 8(6) requires notifying affected individuals and the Authority without undue delay when a breach occurs. Logging alone is insufficient — implement automated alerting (Sentry, PagerDuty, or equivalent) with escalation to a compliance team.

Risk:

The absence of a breach notification mechanism means that in the event of a data breach, affected individuals and the relevant authority may not be notified promptly, leading to potential regulatory penalties and loss of trust.

Fix:

1. Integrate a monitoring and alerting service (e.g., Sentry, PagerDuty) into the application's error handling and logging pipeline.
2. Configure the alerting service to trigger notifications for critical errors or security events that could indicate a data breach.
3. Establish an escalation policy within the alerting service to notify a designated compliance team or individual.
4. Develop a documented incident response plan that includes steps for investigating and managing data breaches triggered by these alerts.

DPDP:

Section 8(6) — Requires notification to affected individuals and the Authority without undue delay when a personal data breach occurs.

Example:

```
import sentry_sdk
sentry_sdk.init( dsn="YOUR_SENTRY_DSN", # Set traces_sample_rate to 1.0 to
capture 100% of transactions for performance monitoring. # We recommend adjusting this value
in production. traces_sample_rate=1.0, # If you wish to associate users to errors (assuming
you have an auth system, etc.) # user_info_enabled=True, ) # Example of capturing an exception
try: 1 / 0 except ZeroDivisionError: sentry_sdk.capture_exception(ZeroDivisionError("division
by zero"))
```

Finding 2 of 4

[Section 5 — Notice]

2. [INFO] NO_THIRD_PARTY_DETECTED — N / A

No known third-party analytics or tracking SDKs detected in codebase.

Finding 3 of 4

[Section 5 — Purpose Limitation]

3. [INFO] NO_THIRD_PARTY_DATA_SHARING — N / A

No third-party data sharing detected.

Finding 4 of 4

[Section 16 — Cross-Border Transfer]

4. [INFO] NO_CROSS_BORDER_DETECTED — N / A

No foreign cloud or non-India region config detected.
