DPDP Compliance Scan Report

No personal identifiable information (PII) is collected or stored by this script. The primary risk surface relates to the functionality of the audio player itself, not data privacy.

Total findings: 4

INFO: 4

Tech Stack: JavaScript

Risk Profile: No personal identifiable information (PII) is collected or stored by this script. The primary risk surface relates to the functionality of the audio player itself, not data privacy.

Compliance score by section

DPDP Section	Weight	Score	Status
Section 6	22	22/22 (100%)	PASS
Section 6(6)	8	8/8 (100%)	PASS
Section 8(1)	18	18/18 (100%)	PASS
Section 8	10	10/10 (100%)	PASS
Section 8(3)	8	8/8 (100%)	PASS
Section 8(4)	8	8/8 (100%)	PASS
Section 8(6)	8	8/8 (100%)	PASS
Section 9	6	6/6 (100%)	PASS
Section 11	6	6/6 (100%)	PASS
Section 16	4	4/4 (100%)	PASS
Section 5	2	2/2 (100%)	PASS
Section 13 — Grievance Redressal		4/4 (100%)	PASS

Rule	Section	Severity	File
NO_THIRD_PARTY_DETECTED	Section 5 — Notice	INFO	N/A
NO_THIRD_PARTY_DATA_SHARING	Section 5 — Purpose Limitation	INFO	N/A
MINIMAL_CONSOLE_LOGGING	Section 8(6) — Breach	INFO	N/A
NO_CROSS_BORDER_DETECTE D	Section 16 — Cross-Border Transfer	INFO	N/A

Details

Finding 1 of 4

[Section 5 — Notice]

1. [INFO] NO_THIRD_PARTY_DETECTED — N / A

No known third-party analytics or tracking SDKs detected in codebase.

Finding 2 of 4

[Section 5 — Purpose Limitation]

2. [INFO] NO_THIRD_PARTY_DATA_SHARING — N / A

No third-party data sharing detected.

Finding 3 of 4

[Section 8(6) — Breach]

3. [INFO] MINIMAL_CONSOLE_LOGGING — N / A

Only minimal client logging (e.g. console.log) detected — not sufficient for breach forensics or server-side audit trails. Add structured application logging and breach alerting (Sentry, PagerDuty, or equivalent).

Finding 4 of 4

[Section 16 — Cross-Border Transfer]

4. [INFO] NO_CROSS_BORDER_DETECTED — N / A

No foreign cloud or non-India region config detected.

AI-Identified Compliance Gaps

The following gaps were identified by AI analysis and cross-validated. These are advisory observations, not verified rule violations. Human review is required before acting on these findings.

[AI-INFERRED] No user data export functionality

Confidence: 55%

Section 8 Right to Access

The repository context states 'Song metadata collected via JavaScript array initialization stored in script memory' and 'User playback interactions (play, pause, next, prev, seek) processed via JavaScript event listeners'. There is no mention or evidence of a mechanism for users to access or download this collected data.

Recommendation: Implement a feature allowing users to request and download their playback history and any associated metadata.

[AI-INFERRED] Unclear purpose for playback data

Confidence: 50%

Section 5 Purpose

The repository context mentions 'User playback interactions (play, pause, next, prev, seek) processed via JavaScript event listeners'. The specific purpose for collecting and processing these interactions is not detailed, raising questions about whether this aligns with a clearly defined and legitimate purpose.

Recommendation: Document and clearly state the specific business purpose for collecting and processing user playback interaction data. Ensure this purpose is communicated to users.

[AI-INFERRED] No audit trail for data access

Confidence: 45%

Section 8(4) Audit Trail

While the repository context focuses on data collection and processing, there is no indication of an audit trail being implemented for access to the collected song metadata or user playback interactions, which could be considered personal data in certain contexts.

Recommendation: Implement logging for any access or processing of user playback interaction data, creating an audit trail for accountability.
